GALUCHO

Galucho is a Portuguese family-owned business founded in 1920 and located in São João das Lampas.

From the production of hand tools and utensils for agriculture to the production of agricultural machinery, Galucho's growth was notorious, and we quickly became a reference brand in agricultural equipment and recognized for the quality and durability of the products we produce.

Supported by the knowledge acquired, engineering and proprietary technology, we have also witnessed the growth of the Transport Equipment business area, with which we attend to the transport needs of different types of goods.

With more than 100 years of activity, Galucho is currently specialized in the manufacture of equipment for agriculture and for the industrial transport. Has production centers in Portugal (São João das Lampas and Albergaria) and some strategic partners for the distribution of equipment in international markets, having exported throughout its history to more than 100 countries.
